Protiviti InsightViews

An Analytics Quick Start for SAP

Protiviti InsightViews are an **Analytics Quick Start** for your Intelligent Enterprise. Focused on the most common and relevant information and analytics needs across a broad range of common business use cases, InsightViews are **Foundational Building Blocks** for your SAP HANA analytics environment. With a rich library of optimized views, Protiviti's InsightViews are the culmination of hundreds of HANA analytics implementations and thousands of hours of development.

Protiviti's InsightViews follow our proven methodology and focus on our core HANA technical principals: **Speed, Agility, Sustainability.**

Modular in design, InsightViews can be configured as a comprehensive **Modern Data Layer** across all SAP domains or deployed for specific business areas such as FI/CO or SD. Regardless of the approach, InsightViews help form the analytics foundation of your Intelligent Enterprise.

SAP Cloud Platform

Data Warehouse Cloud

HANA and HANA Cloud

InsightViews Benefits:

Modernize Your Analytics Capabilities
Agility. Accessibility. Performance. Real-Time. Modern business users demand these capabilities, and Protiviti's InsightViews deliver. Built and designed for the SAP HANA platform, InsightViews provide real-time performance delivered in business terminology to help users understand and engage.

Business Value and Best Practices
Born from hundreds of real-world solutions, InsightViews address common, repeatable, and foundational analytic needs. Bridging the gap between technical best practices and functional business value, they are designed to enable business analysis while maintaining optimal performance and consistent, reusable logic.

Accelerate Your Transformation
A key driver in any transformation is the ability to adapt and innovate quickly and at the speed of business. By leveraging InsightViews, our clients have been able to deliver solutions in far less time, engage new initiatives with greater confidence, and establish business relevancy and alignment never before possible.

Sustainability and Growth
InsightViews have been built for analytics and are meant to be enhanced and expanded as new needs arise. Whether modifying KPIs, adding new or non-SAP data for enhanced insights, or aligning to next generation platforms like CFIN or S/4HANA, InsightViews adapt, evolve and transform as your organization does.

INNOVATE. TRANSFORM. SUCCEED.
